Dated: December 13, 2011

State of Rhode Island Department of Administration
Division of Purchases

REVISED
December 13, 2011

NOTICE TO CONTRACTORS
AND VENDORS BIDDING
ON PUBLIC WORKS PROJECTS

Effective **January 1, 2012** all Public Works related project proposals exceeding Seven Hundred Fifty Thousand (\$750,000) dollars are required to include a "public copy." All agency contract solicitations, requests for proposals, invitations for bids, etc. shall state that any bid or proposal that exceeds Seven Hundred Fifty Thousand (\$750,000) dollars must include a copy to be available for public inspection upon the opening of the bids. Any bid or proposal in excess of Seven Hundred Fifty Thousand (\$750,000) dollars which does not include a copy for public inspection shall be deemed to be non-responsive. Additionally, proposals submitted for a Master Price Agreement, when the total amount potentially may exceed Seven Hundred Fifty Thousand (\$750,000) and the solicitation expressly requires any or all vendors to submit a public copy, must include a copy to be available for public inspection.

For further information, please see R.I. Gen. Laws Section 37-2-18(j) and State Procurement Regulations at www.purchasing.ri.gov. This requirement applies to all public works projects (vertical and horizontal) exceeding Seven Hundred Fifty Thousand (\$750,000) dollars and any combination of base bid plus all alternates.

In accordance to the State Procurement Regulations that will become effective January 2, 2012 the following conditions are required:

- 1 All bid proposals shall be opened publicly and read aloud.
2. Each bid, together with the name of the bidder, shall be recorded and an abstract made available "immediately" for public inspection.

3. Copy of the redacted bid proposal shall be available for public inspection by the close of the business the day the subject bid(s) and/or contract(s) is opened by the Division of Purchases.
4. The burden to identify and withhold from the public copy that is released at the bid opening any trade secrets, commercial or financial information, or other information the bidder deems not subject to public disclosure pursuant to Chapter 38-2, the Access to Public Records Act, shall rest solely and exclusively with the bidder submitting the bid proposal.
5. At the time that a proposal is submitted, a bidder must submit a redacted copy of the bid proposal in a PDF (Portable Document File) file format on a read only CD-R Media Disk (hereinafter referred to as a "CD"). Vendors are required to provide all documents submitted in response to the bid solicitation on the CD.
 - a. The acceptable media is a CD-R. Media that is read/writable (CD RW) will not be accepted.
 - b. Only readable, not writeable media is acceptable.
 - c. Vendor is responsible for supplying their own CD-R media
 - d. Vendor is responsible for the integrity of the CD.
6. Failure of the bidder to submit a public copy on a readable CD, as required by RIGL 37-2-18 as amended, shall result in the disqualification of said bid.
7. CD must be enclosed in a protective cover and the protective cover clearly labeled with the following:
 - a. Marked "Public Copy"
 - b. Title of Solicitation as it appears on the RIVIP cover letter.
 - c. Name of Company and Vendor ID as it appears on the RIVIP cover letter.
 - d. Bid Response Number as it appears on the RIVIP cover letter.
 - e. Date of Bid as it appears on the RIVIP cover letter.
8. Bid response on CD-R to be in a PDF (Portable Document Format)
 - a. One PDF file will be on the CD-R. File to meet the following requirements:
 - i. Only one file will contain all documents in response to the bid. If you have more than one document for the response, the documents must be concatenated or merged into one PDF document. Failure to submit only one PDF file may result in disqualification of bid.
 - ii. File should be named in the following manner:
 1. BidNumber_DateofBid_VendorName_VendorID pdf. Where:
 1. Bid Number is the bid number for which the response is for as it appears on the RIVIP cover sheet.
 2. Dateofbid is date of bid using the format (mm-dd-yyyy).
 3. VendorName is the name of the vendor as one word – no spaces or punctuation.
 4. Vendor ID as it appears on the RIVIP vendor cover sheet.

Note: you must use underscores in separating the fields. Do not use underscores anywhere else in the filename other than to separate the fields.

Example: 1234567_06-01-2011_Vendor1_9876.pdf

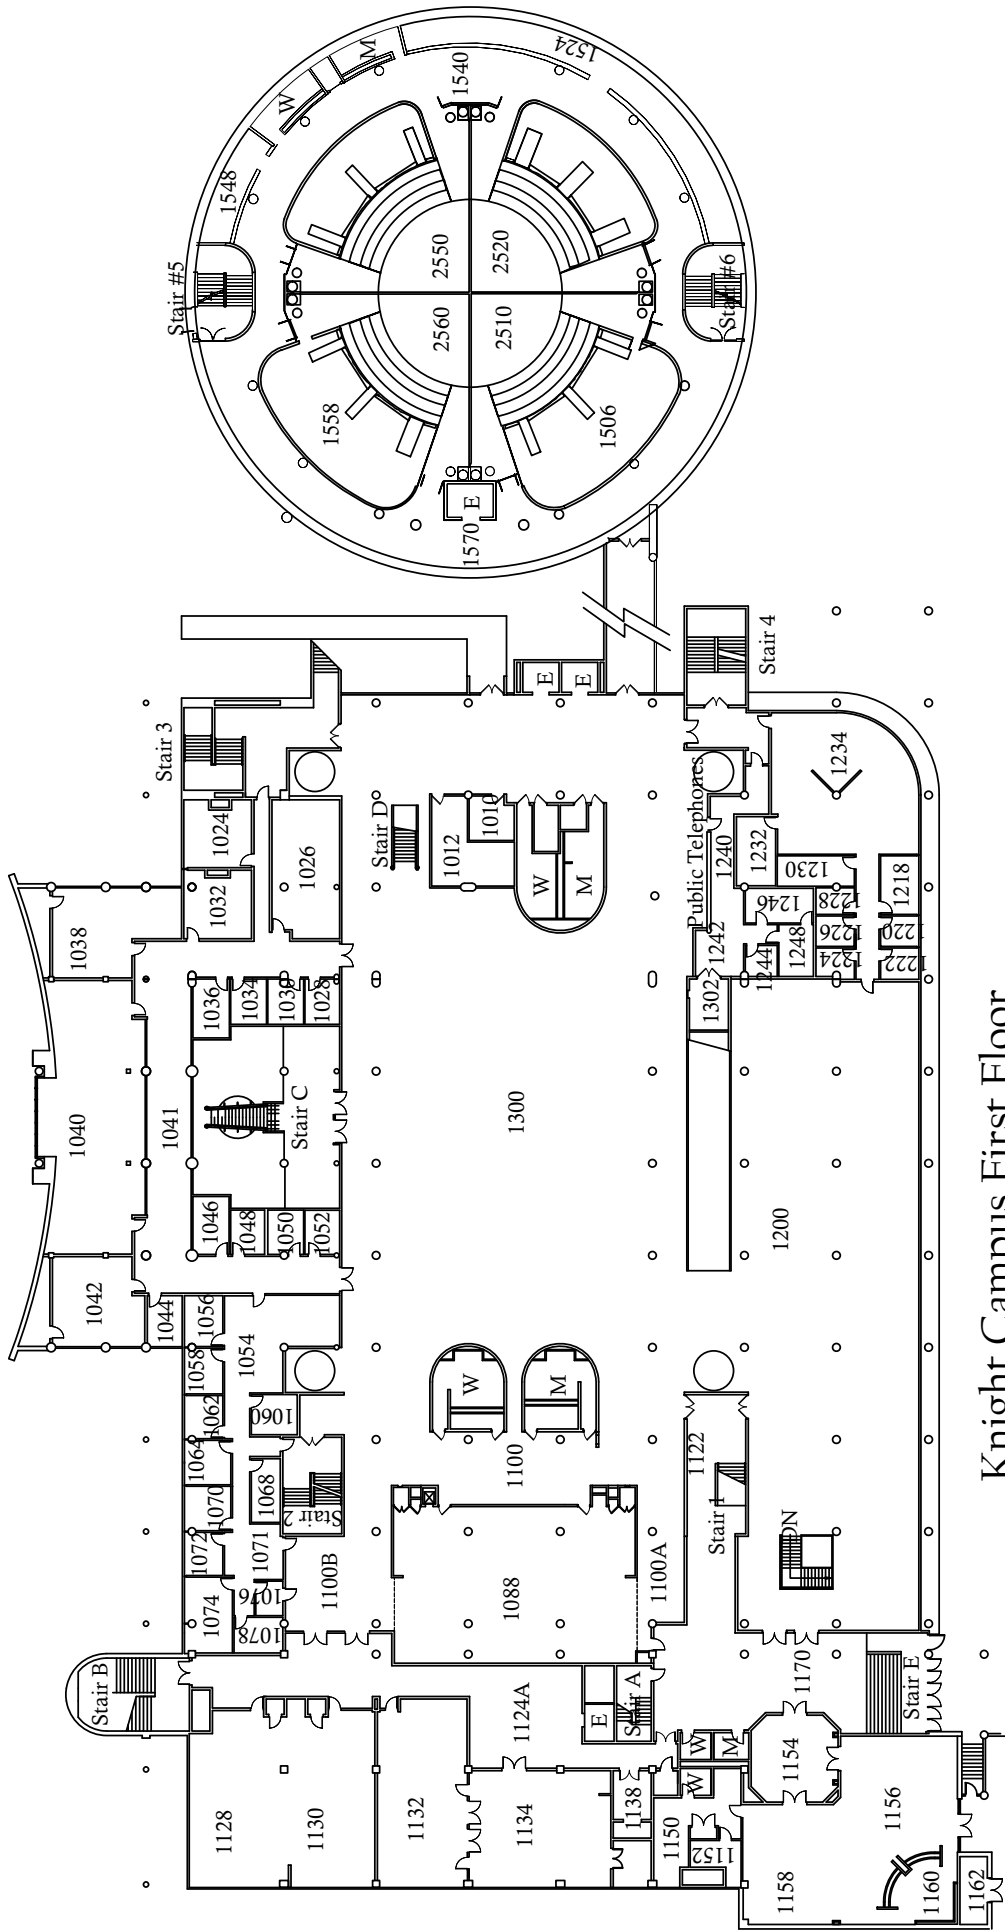

9. Purchasing staff will officially conclude the bid opening and all loaded proposals will be posted to the Purchasing web site. All proposals will be available immediately after bid opening www.purchasing.ri.gov.

VON DUPRIN® 9827/9927 Surface Mounted Vertical Rod Device

9827/9927 surface mounted vertical rod device for all types of single or double doors, UL listed for Panic Exit Hardware. Devices are ANSI A156.3 – 2001 Grade 1. Covers stock hollow metal doors with 86 or 161 cutouts. The 9827 device has a smooth mechanism case and the 9927 device has a grooved case. The surface vertical rod device is non-handed except when the following device options are used: SD (Special Dogging), or SS (Signal Switch). See Opposite page for available outside trim and functions.

The 9827/9927 devices are available in the following finishes: US3, US4, US10, US26, US26D, US28, 313AN, 315AN and US32D for the 9827 device only. See page 52 for component finishes and the inside cover for finish chips.

Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors. Refer to page 49

Nomenclature - How To Order

AD-Series

Exit Trim Compatibility

The AD-Series Electronic Lock is available in 993 Exit Trim for use on openings that require exit devices for either retrofit or new construction applications. Offline and networked solutions are available.

The 993 Exit Trim was designed to suite with AD-Series cylindrical and mortise locksets to ensure that the facility remains aesthetically consistent.

The AD-Series 993 Exit Trim utilizes universal hardware to simplify installation of offline trim to a variety of exit devices, including Rim style from Von Duprin, Falcon, Sargent, Corbin Russwin, Dorma, and Yale.

Available Exit Trim Styles:

- 993R – Rim or Concealed Vertical Rod (CVR for metal doors only)
- 993S – Surface Vertical Rod
- 993M – Mortise

Yale 7000 Rim	X		
Corbin Russwin 5000 Rim	X		
Dorma 9300 Rim	X		

Note: The AD-300 and AD-400 Exit Trim are exclusively compatible with the Von Duprin 98/99 exit devices utilizing a low current request-to-exit switch (LC-RX).

Features

- Multiple Credential Reader Options
- Offline and Networked Communication Options
- A wide variety of finishes and lever styles
- Power options that include hardwired (12 VDC or 24 VDC) or batteries (4AA or 8AA)
- Compatible with most Standard, FSIC or SFIC keyways from major brands of master key systems including Schlage, Sargent, Corbin, Medeco and Yale

U.S. Postal regulations prohibit master keying of mailbox locks. Mailboxes must be ordered specifically for Falcon cylinders from the mailbox manufacturer.

954 Specify 5, 6 or 7-pin

Note: Specify finish: 606, 626

To order, specify cylinder number, keyway and finish.

Cylinder Types

Standard Cylinders

Schlage locks are provided with cylinders precision-built to extremely close tolerances and the highest standards of accuracy. Using only solid brass bar stock plugs and shells, phosphor bronze springs, and nickel silver keys and bottom pins ensures long life and ease of operation. Our 6-pin Everest cylinders in C123 keyway with two patented keys are standard for stock. C145 is standard for new master key systems.

Primus® High Security Cylinders

Primus high-security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest or Classic keyways. In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Primus Lockout Cylinders

For doors where it is frequently desirable to disable all keys from operating the lock temporarily use lockout cylinders. The special lockout key can be removed while the plug is turned to the 11 o'clock position, preventing all normal operating keys, including master keys, from fully entering the cylinder.

Suggested applications for lockout cylinders include laboratories, dark rooms, clean rooms and exterior doors to dormitories.

Schlage will not master key lockout cylinders.

AD-400 Wireless Electronic Lock

AD-Series electronic locks from Schlage are designed to be modular and provide more options to choose from, more functionality in the lock and more compatibility with existing systems. Its patent-pending modular design allows the lock to be customized to fit the needs of an application now, and can change to meet future needs without removing it from the door.

Factory orderable options include choices of credential readers, chassis type, network configurations, locking functions, power options, lever styles and finishes. It also offers a wide selection of features that can be configured in the field to customize your openings.

To simplify installation, the AD-Series combines all the hardware components required at the door for a complete access control system into one integrated design that includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper guard and more.

The AD-400 wireless networked lock gives you all the benefits of a hardwired access control system—without the wires. This allows you to secure doors that were traditionally difficult to run wires to in the past—and increase the security throughout your facility.

The AD-400 has a number of features built in that are configurable in the field and a long list of items that can be monitored by access control software.

Features

- Open Architecture platform
- Panel interface options ensure seamless communication with your system
- Non-invasive installations for historic buildings and sensitive areas
- Secure encrypted data transmission
- Unique communication protocols that won't interfere with other wireless networks
- Patent-pending wireless feature that enables efficient centralized lockdown in less than 10 seconds while still optimizing battery life up to 2 years
- Available in cylindrical, mortise, mortise with deadbolt and exit trim
- Compatible with major brands of master key systems

Reliable Communications

Secure and reliable wireless communication with the Panel Interface Module (PIM) is accomplished using 900 MHz frequency. 900 MHz band enables longer transmission ranges because signal propagation with longer wavelengths travels a greater distance and better penetrates typical building construction – allowing for simplified system design.

System Configuration

Wake-Up On Radio

This feature enables implementation of wireless locks in applications where centralized lockdown or unlock is required. 'Wake Up on Radio' utilizes patent-pending technology to enable real-time activation at a remote battery-powered wireless lock. The technology is configurable from 10 to 1 second increments.

Panel Interface Module (PIM400)

The PIM400 (sold separately) is required for communication between the AD-400 wireless lock and the access control panel, and can support up to 16 locks depending on your access control system.

Dimensions

High Security Series Electromagnetic Lock

Overview

The M400 Series line of electromagnetic locks from Schlage are designed with the customer in mind to be robust, easy to install, and secure. The new bayonet mounting feature makes installs easier, allowing the installer to have their hands free during the mounting process. There is no need to consider door handing as all the M400 Series electromagnetic locks are both non-handed and symmetrical, allowing optimum placement of the magnet no matter the application.

All M400 Series locks have automatic voltage sensing for 12 and 24 volts along with polarity protection to make wiring less complex. The M450 is tested and certified to meet or exceed UL1034 and BHMA 1000lb. hold force requirements.

The M450 electromagnetic lock comes in two configurations to meet your specific security needs. The M450 provides basic security, while the M450P provides intelligent sensing and reporting features needed to integrate with access control systems. Additional options are available for the M450P. Kits are available for top jam, double door, and glass door applications.

Features

- Bayonet mount makes installation simpler by not requiring magnet to be held overhead while mounting screws are installed
- New design allows for RH/LH configuration in the field
- Armature mount allows armature to pivot compensating for slight opening imperfections
- Limited Lifetime Warranty
- UL1034 and BHMA Grade1 certified
- 1000 lb. Hold Force
- See page 2 for additional features and options

ADDITIONAL FEATURES

M490/M492

- **Automatic Voltage Selection (AVS)** senses the voltage applied to the lock and responds accordingly

M490P/M492P

- **Magnetic Bond Sensor (MBS)** monitors the strength of the bond between the lock and armature so you know the door is secure
- **Door Position Switch (DPS)** monitors whether the door is open or closed
- **Relock Time Delay (RTD)** provides a relock delay that is adjustable from 0.5 to 30 second

Optional

- **Anti-Tamper Switch (ATS);** MBS indicator (LED) for M490P/M492P

OPTIONS (for all)

- Herculite Door Bracket
- Top Jamb (inswinging doors)

PS902

2 amp Power Supply

Overview

Schlage's comprehensive line of power supplies and option boards were designed to address the changing needs of the access control market.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This new design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified strikes, maglocks, card readers, etc).

Common to the line of PS900 series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal provided.

All PS900 Series of power supplies and option boards have been tested and certified to meet UL294.

Features

- 2A @ 12/24 VDC output, field selectable with jumper
- Class 2 Rated power limited output
- Universal 120 -240 VAC input
- Low voltage DC, regulated and filtered
- Single polarized connector for distribution board
- Fused primary input
- AC input and DC output monitoring circuit w/ LED indicators
- Cover mounted AC input indication
- NEMA 1 enclosure
- Hinged cover w/ lock down screws
- High voltage protective cover

OPTIONS

- Emergency Interface Relay (FA)
- Battery Backup
- 2 relay QEL panic device control board
- 4 relay distribution board
- 4 relay distribution board with logic
 - Field configurable for:
 - Time delay function
 - Auto operator
 - Security interlock
- 8 fused output distribution board
- 8 PTC output distribution board

Security Management System SSRC Smart Reader Controller

Overview

The Schlage Smart Reader Controller (SSRC) is an intelligent device with a modular approach. The SSRC is an independently programmable device that effectively combines the capabilities of a controller and reader interface into a single board. It communicates with the Security Management System software via TCP/IP protocol and can be connected to a variety of different read head technologies and electronic locking devices. The communication architecture is capable of being fully networked thereby saving the customer wiring and expensive installation labor costs. Includes enclosure with a tamper switch, lock and key.

FEATURES

- Software selectable options allow support for:
 - A single card reader, or
 - Up to (8) AD-300 Hardwired Locks, or
 - One PIM400-485-SMS for support of up to (16) AD-400 Wireless Locks
- Linux operating system
- 64Mb flash memory & 64Mb RAM
- Clock/data, Wiegand or serial (RS232 or RS485; jumper selectable)
- Supports proximity, smart card, magnetic stripe, biometrics, bar code and Wiegand technologies
- Communicates via network protocol 10 Base-T Ethernet
- Connection for on-board unsupervised tamper switch
- Includes four supervised or unsupervised input contacts for devices such as exit request (REX), door position switch (DOD), etc.
- Two Form 'C' single pole/double throw, mechanically latching, 1 A relays

SPECIFICATIONS

- Dimensions: 3-13/16" H x 3-13/16" W x 3/4" D
- Enclosure: 8-1/4" H x 7-1/2" W x 3-1/2" D
- Power requirements: 20 - 32VDC; powered locally
- Power consumption: 100mA (without read heads)
- Ambient temperature: 0° to 49° C or 32° to 120° F
- Humidity: 10% to 90% (non-condensing)
- Recommended cable: Network protocol 10 Base-T Ethernet
- Compatible with Schlage Security Management System software version 5.3.5 and higher
- Requires a UL 294 power limited power supply
- UL 294 Approved with UL approved ethernet data suppressor

Scan II™

Specifications

- 12/24 VDC, 26 mA @ 12 VDC or 24 VDC
- Output Two Form “C” relay contacts rated 1A @ 30 VDC for DC resistive loads
- Operating Temperature -20°F to 120°F (-29°C to 49°C)
- Size 1-1/2" (38mm) H x 6-1/4" (159mm) W x 1-1/2" (38mm) D
- UL Listed

Features

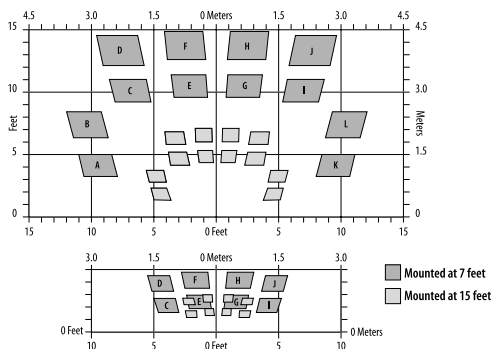

- The Scan II™ is a Passive Infrared Detector specifically designed for “request to exit” applications. It has an adjustable relay latch time, is internally pointable, and provides two Form “C” sets of relay contacts.
- Enclosure design consists of a three piece, high impact ABS plastic enclosure with fresnel lens. Available in white or black.
- Coverage area is up to 8 by 10 feet (2.4m by 3m). Coverage is dependent upon mounting height and pattern angle.
- Pattern Pointability is $\pm 14^\circ$ @ vertical.
- Surface mounting height range is from 7 to 15 feet (2.1m to 4.5m).
- Output – Two Form “C” relay contacts rated 1A @ 30 VDC for DC resistive loads.
- Relay Latch Time is adjustable up to 60 seconds.
- The relay mode can be programmed by the installer to reset when the timer expires or to remain activated until motion stops. The fail safe/fail secure mode can also be selected.
- Unit features an externally visible activation LED.

PIM400-485

Panel Interface Module

For RS485 Communication

The PIM400-485 seamlessly integrates to select access control panels via RS485, eliminating the need for reader interface modules. Each PIM400-485 supports up to 16 wireless access devices such as AD-400 locks.

Reliability

Reliable communications result from several technological advances and incorporated features. 900 MHz spread spectrum technology enables high transmission power in a license-free band. Error detection algorithm maintains data integrity on each transmission and redundant transmissions ensure communication success. Periodic "heartbeat" signals provide supervision and assure reliable RF communications are maintained. Lastly, Dynamic Channel Switching (DCS) can be enabled to overcome harsh RF environments by automatically changing channels to avoid potential interference.

Security

Used extensively by government and military organizations, spread spectrum technology provides significant security advantages over conventional transmission methods. Wireless access devices utilize spread spectrum transmissions, which are encrypted with AES 128-bit keys, to yield a system that is virtually uncompromisable. In addition, scalability is virtually unlimited as each AD-Series wireless access module has nearly a million addresses to choose from during the linking process.

Centralized Lock/Unlock Command in 10 Seconds or Less

Patent-pending Wake-up On Radio (WOR) feature drives communication from the PIM400 to any or all linked wireless devices in 10 seconds or less. This innovative feature works efficiently in parallel with periodic "heartbeat" to maintain up to 2 year battery life on wireless devices such as the AD-400 locks. Response rate can be field configured down to 1 second with consideration of battery life.

Features

- 900 MHz Spread Spectrum RF technology for long range, reliable communications
- Automatic linking to remote wireless access points with 10 channel frequencies to select from enables easy commissioning
- AES-128 bit Encrypted Spread Spectrum transmissions
- 5 visual indicators to quickly pinpoint and display status
- Flash memory for easy firmware upgrades

ADDITIONAL FEATURES

Reliable Communications

900 MHz band enables longer transmission ranges. In general, signal propagation with longer wavelengths travel a greater distance and penetrate through, and around objects better than signals with shorter wavelengths.

Online Communications (Heartbeat)

Regular communications between the AD-Series wireless access module and PIM400 monitor transmission presence and integrity. Online communications enable the PIM400 to download information or instructions such as unlock and relock.

Auto Addressing (Linking)

One of the final steps in the installation process is called "linking". Linking ties a specific wireless access module to a selected PIM400 and assigns a unique address. There are over 65,000 unique addresses available per channel, providing nearly a million combinations for virtually unlimited scalability.

Assured Communications

A Packet-Error-Rate-Test (PERT) is performed during linking, assuring greater than 99.0% of all messages get through.

Encoded Transmissions

Each RF transmission is encrypted with AES-128 bit keys to provide virtually uncompromisable security.

Tamper

The PIM400 cover is monitored by a tamper switch.

SXF1560

Wall Mount Reader

Contactless Smart Card Reader

Overview

The SXF1560 Contactless Smart Card Wall Mount Reader supports 13.56 MHz contactless smart card technology. The SXF1560 is ideal for new installations for a smart card environment.

The SXF1560 supports high security and provides multiple applications including access control ID numbers and biometrics. Additional security measures include mutual authentication and message authentication coding.

The SXF1560 Contactless Smart Card Wall Mount Reader is compatible to all applicable ISO standards (14443 and 15693).

Features

- Modular Design: Allows easy, upgradeable changes in the field
- Read Range: up to 4.5 inches
- Tri-state LED (red, green, amber): Visual indicator and audio feedback representing status and activity information
- Advanced tamper detection with optical sensor
- Environment: accommodates interior, exterior, metal and non-metal installation environments
- Security/Key Management: several options to ensure the greatest choice between "open" or high security credential security
- Warranty: limited lifetime against defective workmanship and materials

FEATURES AND SPECIFICATIONS

Durability/Warranty

The SXF1560 is manufactured with the highest quality UV-resistant materials. These plastics inhibit discoloration in all types of environmental conditions, including direct sunlight. The readers feature potted electronics and circuitry for protection against inclement weather. We protect our customers with a limited lifetime warranty, providing full confidence in your reader products.

Schlage Utility Software (SUS) on the Handheld Device (HHD)

Schlage Utility Software (SUS) is designed specifically for use on the Handheld Device (HHD) as the link between your access control management software and Schlage electronic offline and networked locks and accessories. This solution consolidates and simplifies programming and managing your access control system.

The SUS and HHD is used to initialize, configure and test product operation, and also provides an easy way to manage people, audits, locks and other network panel interface devices for simple access control. The intuitive screen layout for the SUS provides easy navigation during use.

For offline products the SUS is utilized to transfer access control data, such as authorized user lists, via the HHD to the locks. The SUS is also utilized to download audit trail information from offline devices to the HHD and then transfer that data to the access control management software.

In addition the SUS can configure other networked electronic devices (including PIM and PIB) and update firmware revision updates to the devices as desired.

The HHD connects with Schlage AD-Series electronic locks and accessories via a USB interface and utilizes Active Synch or Win Mobile Device Manager to communicate with your PC via the USB port. The HHD is also able to connect to the SPED, KC2, CM, CL, CT500, CT1000, CL Controller and WA-Series PIMs via a serial cable connection.

Contactless Smart Credentials using MIFARE® Technology

Simply Smarter

Overview

Schlage's contactless smart credentials put you in control by delivering smarter solutions. Schlage's Contactless Smart Credentials using MIFARE® technology provide the choice of 2.5k, 8k or 32k bits of storage to meet the most demanding data storage requirements. This enhanced data storage allows for a wide range of card applications such as biometrics, transit and point of sale applications such as cashless vending and cafeteria services. ISO 14443A standards providing a faster data transfer speed (up to 424 kBd).

The contactless smart credential by Schlage operates on a 13.56 MHz frequency and also utilizes high security encrypted data which is mutually authenticated in communication between the card and reader, providing an infinite number (many trillions) of unique badge ID codes.

With the Contactless Smart Credentials using MIFARE technology, there is very little wear and tear on the cards ensuring longer life for your cards. These credentials also have a passive design which requires no batteries or maintenance for the life of the card.

Security Management System *Enterprise Software*

Overview

The Schlage Security Management System delivers a powerful, single source solution for integrating a facility's access-control technologies, digital video, and alarm monitoring systems. Four software levels are provided to meet your current security requirements and can expand to meet your growing business needs, while satisfying your budget constraints.

The Enterprise system is perfect for large, multi-site or global organizations. It supports an unlimited number of cardholders and readers and gives you unparalleled flexibility. The Enterprise system also enables an organization to manage facility administration from any location and provides real-time monitoring and audit trails.

FEATURES & BENEFITS

Access Control Features

- Anti-passback
- Two-man rule and occupancy rule
- First card in capability
- Temporary usage badges
- Reliability and power of MS SQL available
- Portrait monitoring
- Unlimited reports

(continued)

ORDERING INFORMATION

Software Only

E-SENT-SFT-1 - Enterprise software with 1 license

E-SENT-SFT-5 - Enterprise software with 5 client licenses

E-SENT-SFT-10 - Enterprise software with 10 client licenses

E-SENT-SFT-25 - Enterprise software with 25 client licenses

E-SENT-SFT-EXP - 1 client expansion license (for greater than 25 licenses)

Software & Server

E-SENT-SVR-1 - Includes server, monitor, keyboard, mouse and software with 1 license

E-SENT-SVR-5 - Includes server, monitor, keyboard and mouse sold separately and software with 5 client licenses

E-SENT-SVR-10 - Includes server, monitor, keyboard and mouse sold separately and software with 10 client licenses

E-SENT-SVR-25 - Includes server, monitor, keyboard and mouse sold separately and software with 25 client licenses

Servers are also available in rack mount versions. Call factory for details.

FEATURES & BENEFITS *(continued)*

- Report scheduling
- ODBC Compliant
- Operates in Windows 2000, 2003, XP Professional, Vista and Windows 7 (except Home Editions)
- Online and offline lock integration
- Manual and automatic overrides
- Full-featured Guest Pass system
- Design and print badges
- Programmable flash for downloads and firmware updates
- Wireless reader devices
- Unlimited holidays
- Unlimited cardholders and readers
- Unlimited number of concurrent users available
- Unlimited time zones
- Universal triggers
- Schlage AD-Series and CO-Series lock support
- Video retrieval tied to access control events (optional)

Alarm Management Features

- Color coded Alarms
- User-definable individual alarm instructions
- Pre-defined responses
- Send alarms to operator or email
- Keypad duress alarm
- Alarm annunciation
- Alarm graphics

Video Features (See SEVMS datasheets for specifications)

- Full integration with Schlage DVR/NVR
- High resolution video motion detection with masking capabilities
- Search on video motion detection
- Uninterrupted recording during playback and image archiving
- Remote viewing
- Send video clips via email
- Customizable pre and post-recording upon an event
- Proprietary viewer software for viewing encrypted files
- Scalable
- 100% date/time synchronization
- Full PTZ functionality
- Virtual camera grouping across servers
- Advanced security permissions
- Database backup and recovery
- Audio per camera available
- Web-based option
- Optional intelligent video and Mobile DVR
- Accepts analog/digital or IP addressable cameras

Usability Features

- Configuration wizards
- Easy-to-navigate
- Customizable views per operator
- Unlimited User-defined fields

A. Exit Devices

1. Provide exit devices tested to ANSI/BHMA A156.3 Grade 1, and UL listed for Panic Exit and/or Fire Exit Hardware. Cylinders: Refer to 2.04 KEYING.
2. Provide touchpad type exit devices, fabricated of brass, bronze, stainless steel, or aluminum, plated to the standard architectural finishes to match the balance of the door hardware.
3. Exit devices shall incorporate a fluid damper or other device that eliminates noise associated with exit device operation. Touchpad shall extend a minimum of one half of the door width, but not the full length of the exit device rail. End-cap will have two-point attachment to door. Touch-pad shall match exit device finish, and shall be stainless steel for US26, US26D, US28, US32, and US32D finishes; for all other finishes, the touch-pad finish shall be of compatible finish to exit device. Only compression springs will be used in devices, latches, and outside trims or controls.
4. Devices to incorporate a deadlatching feature for security and/or for future addition of alarm kits and/or other electrical requirements.
5. Vertical rod devices shall be capable of being field modified to less bottom rod devices by removal of bottom rod and adding firing pin(s), if required at fire rated openings.
6. Provide manufacturer's standard strikes.
7. Provide exit devices cut to door width and height. Locate exit devices at a height recommended by the exit device manufacturer, allowable by governing building codes, and approved by the Architect.
8. Mechanism case shall sit flush on the face of all flush doors, or spacers shall be furnished to fill gaps behind devices. Where glass trim or molding projects off the face of the door, provide glass bead kits.
9. Exit devices for fire rated openings shall be UL labeled fire exit hardware.
10. Acceptable manufacturers and/or products: Von Duprin 99 series, No Substitute.

B. Provide a new key system from the same manufacturer as the locks conforming to the following requirements:

1. Provide patented standard cylinders at all keyed items. Patent shall protect against the unauthorized manufacturing and duplication of the products. Patented cores shall not be operable by non-patented key blanks. Patented cores shall incorporate a mechanism to check for the patented features on the keys.
2. Provide permanent cylinders keyed by the manufacturer or authorized distributor as directed by the Owner. Provide owner with a copy of the bitting list, return receipt requested.

3. The hardware supplier, accompanied by a qualified factory representative for the manufacturer of the cores and cylinders, shall meet with Owner and Architect to review keying requirements and lock functions prior to ordering finish hardware. Submit a keying schedule to Architect for approval.
4. Provide cylinders, unless noted otherwise, operated by a Grand Master Key System to be established for this project (Do not use the letter "I", "O", or "X" for any of the grand masters). Allow for twenty-four Master Keys under each Grand Master, and sixty-four changes under each master key. All cylinders shall be keyed in alike or different sets as noted by their respective key set number. Do not use the letter "I" or "O" in any of the master key sets.
5. Provide patented keys as follows:
 - a. Ten grand master keys for each set.
 - b. Ten master keys for each set.
 - c. Three keys per core.
6. Visual key control:
 - a. Keys shall be stamped with their respective key set number and stamped "DO NOT DUPLICATE".
 - b. Grand master and master keys shall be stamped with their respective key set letters.
 - c. Do not stamp any keys with the factory key change number.
 - d. Do not stamp any cores with key set on face (front) of Core. Stamp on back or side of cores so not to be visible when core is in cylinder.
7. Deliver grand master keys, master keys, change keys, and/or key blanks from the factory or authorized distributor directly to the Owner in sealed containers, return receipt requested. Failure to comply with these requirements may be cause to require replacement of all or any part of the keying system that was compromised at no additional cost to the Owner.
8. Approved products: Schlage Everest C, No Substitute.

2.1 ELECTRONIC ACCESS CONTROLLED LOCKSETS

2.1.1 AD-SERIES - WIRELESS COMMUNICATION

2.1.1.1 AD-400

A. General Requirements

1. Lockset and Exit device listed to UL294.
2. Lockset and Exit device trim to meet or exceed A156.25 Grade 1 Operational and Security.
3. Lockset and Exit device trim listed to UL10C, FCC Part15, Florida Building Code Standards TAS 201 large missile impact, TAS 202 and TAS 203. Lockset and Exit device trim shall be compliant with ICC / ANSI A117.1 NFPA 101, NFPA 80, and Industry Canada RSS-210.
4. Modulation to be 900 MHz spread spectrum, direct sequence, 10 channels.
5. Wireless Transmission / Encryption: AES-128 bit Key minimum.
6. Lockset and Exit Device Trim to be manufactured with open architecture characteristics capable of handling new and existing access control software and credential reading technology.
7. Lockset to be modular in design, to have the ability to change credential reader without being removed from door.
8. Exit Device Trim to be modular in design, to have the ability to change credential reader in the field.
9. Locking escutcheon, security lever trim and to be non-handed, operate independently of non-locking levers for extended life cycles. Handing to be field reversible.
10. Lockset and Exit Device Trim to have the following standard status switches: Lock/Unlock Status (Clutch Position), Request-to-Exit Switch, Request to Enter Switch, Door Position Switch, Deadbolt Position, Interior Cover Tamper Guard.
11. Exterior lever to be designed with ability to rotate freely while door remains securely locked, preventing damage to internal lock components from vandalism by excessive force.
12. Lockset and Exit Device Trim to communicate Battery Status and Communication Status.
13. Furnish locks with following functions which will be field configurable without taking the lock off the door:
 - a. Office 70.
14. Lockset powered by four AA batteries.
15. Should power be lost to device, Lockset and Exit Device Trim to have the ability to be field configured to manage access control in one of the three field configurable methods below:
 - a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
16. Should communication be lost between device and network, Lockset and Exit Device Trim to have ability to manage access control offline in one of four field configurable methods below:
 - a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
 - d. Fail to Degraded/cache mode utilizing cache memory with following selectable options:
 - (1) Grant access up to the last 1,000 unique previously accepted User IDs

- (2) Grant access up to the last 1,000 unique previously accepted Facility/Site codes
 - 17. Lockset and Exit Trim system interface to be:
 - a. Wiegand or Clock & Data via PIM400 (Panel Interface Module).
 - 18. Lockset and Exit Device Trim to have real-time communication with access control system, such that all events at Lockset and Exit Device Trim are communicated real-time to network control software.
 - 19. Lockset and Exit Device Trim utilized with SMS Premier/Enterprise software to have capability to be remotely locked down real-time, within 10 seconds or less, without user interface at the device.
 - 20. Lockset and Exit Device Trim utilized with SMS Premier/Enterprise software to have capability to be remotely unlocked real-time without user interface at the device.
 - 21. Lockset and Exit Device Trim to have visual tri-colored LED to indicate operational systems status, system error conditions and low power conditions.
 - 22. Lockset and Exit Device Trim to have audible feedback that can be enabled or disabled.
 - 23. Credential reader capabilities for SMS Select/Premier/Enterprise Software may include and may not be limited to:
 - a. 13.56 MHz Smart card credentials:
 - (1) Secure section (Multi-Technology and Smartcard): Schlage, XceedID ISO-X, MIFARE, ISO-X Lite, my-d, DESFire 8-EV1.
 - 24. The lock and exit device trim will have the ability to utilize multiple manufacturer's key systems in the lever including:
 - a. Full Size cylinders from Schlage, up to 6-pin cylinders
 - 25. Provide option for tamper torx screws on inside escutcheon for Higher Security
- B. Wireless electronic mortise type locksets:
- 1. Mortise type lockset to have with 3-piece, beveled, stainless steel latchbolts with 3/4" throw and equipped with an anti-friction latch. Chassis will accommodate ANSI standard mortise lock prep with a 2 3/4" nominal backset for 1 3/4" doors as a standard, with 1 3/8" to 2 3/4" thick doors in 1/8" increments available. Locksets will be non-handed. Lockset to meet or exceed A156.25 and A156.13 Series 1000, Grade 1 Operational and Security.
 - 2. Lockset to meet UL10C, FCC Part15, ADA compliant, NFPA 101, NFPA 80, IBC-Ch10
 - 3. Modulation to be 900 MHz spread spectrum, direct sequence, 10 channels.
 - 4. Wireless Transmission / Encryption: AES-128 bit Key minimum.
 - 5. Lockset to be manufactured with open architecture characteristics capable of handling new and existing access control software and credential reading technology.
 - 6. Lockset to be modular in design, to have the ability to change credential reader without being removed from door.
 - 7. Locking escutcheon, security lever trim and to be non-handed, operate independently of non-locking levers for extended life cycles. Handing to be field reversible.
 - 8. Exterior lever to be designed with ability to rotate freely while door remains securely locked, preventing damage to internal lock components from vandalism by excessive force.
 - 9. Lockset and Exit Device Trim to have the following standard status switches: Lock/Unlock Status (Clutch Position), Request-to-Exit Switch, Request to Enter Switch, Door Position Switch, Deadbolt Position, Interior Cover Tamper Guard.
 - 10. Lockset to communicate Battery Status and Communication Status.
 - 11. Furnish locks with following functions which will be field configurable without taking the lock off the door:
 - a. Classroom/Storeroom 70.
 - 12. Lockset powered by four AA batteries.
 - 13. Should power be lost to device, Lockset to have the ability to be field configured to manage access control in one of the three field configurable methods below:

- a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
 14. Should communication be lost between device and network, Lockset to have ability to manage access control offline in one of four field configurable methods below:
 - a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
 - d. Fail to Degraded/cache mode utilizing cache memory with following selectable options:
 - (1) Grant access up to the last 1,000 unique previously accepted User IDs
 - (2) Grant access up to the last 1,000 unique previously accepted Facility/Site codes
 15. Lever style:
 - a. 06 (Rhodes)
 - b. Knurling option to provide tactile feedback to be available.
 16. Lockset and Exit Trim system interface to be:
 - a. Wiegand or Clock & Data via PIM400 (Panel Interface Module).
 17. Lockset to have real-time communication with access control system, such that all events at Lockset are communicated real-time to network control software.
 18. Lockset and Exit Device Trim utilized with SMS Premier/Enterprise software, to have capability to be remotely locked down real-time, within 10 seconds or less, without user interface at the device.
 19. Lockset and Exit Device Trim utilized with SMS Premier/Enterprise software to have capability to be remotely unlocked real-time without user interface at the device.
 20. Lockset to have visual tri-colored LED to indicate operational systems status, system error conditions and low power conditions.
 21. Lockset to have audible feedback that can be enabled or disabled.
 22. Credential reader capabilities for SMS Select/Premier/Enterprise Software may include and may not be limited to:
 - a. 13.56 MHz Smart card credentials:
 - (1) Secure section (Multi-Technology and Smartcard): Schlage, XceedID ISO-X, MIFARE, ISO-X Lite, my-d, DESFire 8-EV1.
 23. The lock and exit device trim will have the ability to utilize multiple manufacturer's key systems in the lever including:
 - a. Full Size cylinders from Schlage, up to 6-pin cylinders
 24. Provide option for tamper torx screws on inside escutcheon for Higher Security
 25. Acceptable Manufacturers: Schlage Electronics Model: AD-400-MS/MD Series
- C. Wireless Electronic Access Controlled Exit Device Trim
1. Exterior lever to be designed with ability to rotate freely while door remains securely locked, preventing damage to internal lock components from vandalism by excessive force.
 2. Modulation to be 900 MHz spread spectrum, direct sequence, 10 channels.
 3. Transmission / Encryption: AES-128 bit Key minimum.
 4. Exit device trim to have Wake-Up on radio feature which enables implementation of wireless locks in applications where centralized lockdown or unlock is required. This is to enable real-time activation at a remote battery-powered wireless lock.
 5. Exit device trim to retract the Von Duprin latch bolt of following exit device applications: rim, surface vertical rod, concealed vertical rod and mortise.
 6. Exit devices to be equipped with low current request to exit switch.
 7. Exit Device Trim to meet UL10C, FCC Part15, ADA compliant, NFPA 101, NFPA 80, IBC-Ch10.

8. Exit Device Trim to be manufactured with open architecture characteristics capable of handling new and existing access control software and credential reading technology.
9. Exit Device Trim to be modular in design, to have the ability to change credential reader in the field.
10. Locking escutcheon, security lever trim and to be non-handed, operate independently of non-locking levers for extended life cycles. Handing to be field reversible.
11. Exterior lever to be designed with ability to rotate freely while door remains securely locked, preventing damage to internal lock components from vandalism by excessive force.
12. Exit Device Trim to have the following standard status switches: Lock/Unlock Status (Clutch Position), Request-to-Exit Switch, Request to Enter Switch, Door Position Switch, Interior Cover Tamper Guard.
13. Exit Device Trim to communicate Battery Status and Communication Status.
14. Furnish locks with following functions which will be field configurable without taking the lock off the door:
 - a. Classroom/Storeroom 70.
15. Lever style:
 - a. 06 (Rhodes)
 - b. Knurling option to provide tactile feedback to be available.
16. Exit Device Trim powered by four AA batteries. Options: Eight AA batteries or a 12V or 24V DC power supply.
17. Should power be lost to device, Exit Device Trim to have the ability to be field configured to manage access control in one of the three field configurable methods below:
 - a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
18. Should communication be lost between device and network, Exit Device Trim to have ability to manage access control offline in one of four field configurable methods below:
 - a. Fail locked (secured)
 - b. Fail unlocked (unsecured)
 - c. Fail As-Is
 - d. Fail to Degraded/cache mode utilizing cache memory with following selectable options:
 - (1) Grant access up to the last 1,000 unique previously accepted User IDs
 - (2) Grant access up to the last 1,000 unique previously accepted Facility/Site codes
19. Lockset and Exit Trim system interface to be:
 - a. Wiegand or Clock & Data via PIM400 (Panel Interface Module).
20. Exit Device Trim to have real-time communication with access control system, such that all events at Exit Device Trim are communicated real-time to network control software.
21. Exit Device Trim utilized with SMS Premier/Enterprise software, to have capability to be remotely locked down real-time, within 10 seconds or less, without user interface at the device.
22. Exit Device Trim utilized with SMS Premier/Enterprise software to have capability to be remotely unlocked real-time without user interface at the device.
23. Exit Device Trim to have visual tri-colored LED to indicate operational systems status, system error conditions and low power conditions.
24. Exit Device Trim to have audible feedback that can be enabled or disabled.
25. Credential reader capabilities for SMS Select/Premier/Enterprise Software may include and may not be limited to:
 - a. 13.56 MHz Smart card credentials:

- (1) Secure section (Multi-Technology and Smartcard): Schlage, XceedID ISO-X, MIFARE, ISO-X Lite, my-d, DESFire 8-EV1.
 26. The lock and exit device trim will have the ability to utilize multiple manufacturer's key systems in the lever including:
 - a. Full Size cylinders from Schlage, up to 6-pin cylinders
 27. Provide option for tamper torx screws on inside escutcheon for Higher Security
 28. Acceptable Manufacturers: Schlage Electronics Model: AD-400-993 Series Exit Device Trim
- D. Panel Interface Module
1. Used for communication of wireless lockset or exit device trim to the access control panel.
 2. To have the following certifications: NEMA1, 4, 4X, 6; 294, FCC Part 15; RoHS.
 3. Modulation to be 900 MHz spread spectrum, direct sequence, 10 channels.
 4. Wireless Transmission / Encryption: AES-128 bit Key minimum.
 5. Power supply required 12VDC or 24VDC.
 6. Acceptable Manufacturer: Schlage Electronics Model: PIM400 Panel Interface Module.
- E. Hand held programming device:
1. Capable of initializing lock and accessories using preloaded Schlage Utility Software
 2. Used to field configure devices:
 - a. Credential Reader Formats
 - b. Lock Function
 - c. Unlock Period
 - d. Power Failure Mode
 - e. Audible Alarm ON/OFF
 - f. Battery Status
 - g. Validate hardware and software revision
 - h. Troubleshooting Status Signals
 - i. Special Access Delay (ADA)
 - j. Delayed Egress (Release Delay)
 - k. Door Propped open Delay
 - l. Lockdown Cancel Delay TimeOut between credential and PIM
 - m. Number of Key presses without valid PIN before lockout
 - n. Current Date/Time
 - o. Enable/Disable Manual Programming
 3. Utilized to download firmware updates and door files to device
 4. Hand Held Device to have:
 - a. 3.5 inch LCD display minimum
 - b. Touch Screen/Keypad Backlit
 - c. 32-bit processor minimum
 - d. Memory: 128MB RAM/256 MB ROM
 - e. Battery: Rechargeable Li-ion
 5. Acceptable Manufactures: Schlage Electronics - HHD series with Schlage Utility Software

Cisco Catalyst Access Switching

Cisco Modular Access Switches

Cisco® Catalyst® 4500E Series:

- Cisco's leading platform for borderless access and price/performance distribution offering up to 848 Gbps in Layer 2 and Layer 3 switching capacity
- First Cisco switch supporting Cisco Universal Power Over Ethernet (60W per port) and Energy-Efficient Ethernet
- Full Borderless Networks services support, including Flexible NetFlow for application visibility and malware detection, medianet, Cisco TrustSec® security, and EnergyWise
- Lowers TCO with simplified operations such as sub-200msec In-Service Software Upgrade (ISSU), Embedded Event Manager, Smart Call Home, Auto Smartports, Limited Lifetime Warranty (LLW)
- Industry's best investment protection in its class with backward and forward compatibility across all generations dating back to 1999
- Single platform for access and distribution supporting up to 384 Fast Ethernet or Gigabit Ethernet (GE) ports (PoE or data) and up to 100 10 Gigabit Ethernet (10 GE) ports per chassis

Cisco Fixed Access Switches

Cisco Catalyst 3750-X Series:

- GE copper and fiber stackable switches with support for advanced Layer 3 and IPv6 capabilities Higher availability and resiliency using StackWise® Plus and Cisco StackPower™ technology combined with dual redundant, hot-swappable power supplies and fan modules
- Feature rich BN services platform with Cisco TrustSec, Medianet & EnergyWise
- Support more PoE devices with 30W power available on all ports simultaneously
- Configuration flexibility and future-proofing with four hot-swappable network modules (GE and 10 GE ports) and the choice of LAN Base, IP Base, and IP Services software
- Ensure data confidentiality and integrity with Media Access Control Security (MACsec) hardware-based line-rate encryption
- EnergyWise for operational cost optimization by measuring actual power consumption of the PoE devices, reporting, and reducing energy consumption across the network
- Smart Operations to simplify LAN deployment, configuration, and troubleshooting
- Investment protection with enhanced limited lifetime warranty (eLLW)

 - GE stand-alone switch with support for advanced Layer 3 and IPv6
 - Feature rich BN services platform with Cisco TrustSec, Medianet & EnergyWise
 - Support more PoE devices with 30W power available on all ports simultaneously
 - Configuration flexibility and future-proofing with four hot-swappable network modules (GE and 10 GE ports) and the choice of LAN Base, IP Base, and IP Services software
 - High availability with dual redundant, hot-swappable power supplies and fan modules
 - Ensure data confidentiality and integrity with MACsec hardware-based line-rate encryption
 - EnergyWise for operational cost optimization by measuring actual power consumption of the PoE devices, reporting, and reducing energy consumption across the network
 - Smart Operations to simplify LAN deployment, configuration, and troubleshooting
 - Investment protection with eLLW <http://www.cisco.com/en/US/products/ps10744/index.html>

The Cisco® Catalyst® 3750 v2 Series is the next generation energy-efficient Layer 3 fast Ethernet, stackable switches. This new series of switches support Cisco EnergyWise technology, which enables companies to measure and manage power consumption of network infrastructure and network-attached devices, thereby reducing their energy costs and their carbon footprint. The Cisco Catalyst 3750 v2 Series consumes less power than its predecessors and is the ideal access layer switch for enterprise, retail, and branch-office environments, as it maximizes productivity and investment protection by enabling a unified network for data, voice, and video (figure 1).

Figure 1 Cisco Catalyst 3750 v2 Series Switches

Product Highlights

- Lower power consumption than its predecessors
- Backward compatible with Cisco Catalyst 3750 and 3750-E Series
- Full Energy Wise support to monitor energy consumption of network infrastructure and implement energy saving programs to reduce energy costs
- Compatible with Cisco Redundant Power System (RPS) 2300
- All units have a uniform depth of 11.9 inches for better cable management
- Preconfigurable with the Cisco IOS Software release at the time of ordering
- IPv6 routing included in the IP Services feature set

Cisco EnergyWise

The Cisco Catalyst 3750 v2 Series supports Cisco EnergyWise, which is a technology that enables monitoring, reporting, and management of energy consumption by end devices that are Cisco EnergyWise enabled. This technology enables companies to reduce their energy cost carbon footprint. These are some of the EnergyWise features available:

- Discover all Cisco EnergyWise enabled devices on the network
- Monitor and report power consumption by these devices
- Implement business rules to control power to these end devices

Cisco StackWise Technology

The Cisco Catalyst 3750 v2 Series are stackable switches with Cisco StackWise® technology. Cisco StackWise technology unites up to nine individual switches into a single logical unit, using special stack-interconnect cables and stacking software. Cisco StackWise stacking creates a 32-Gbps switch interconnection and does not require user ports for stacking. The Catalyst 3750 v2 Series are also fully compatible with Catalyst 3750 and 3750-E stackable switches.

Ease of Use and Deployment

With features such as auto smart ports, smart install, configuration replace and rollback, and auto QoS, the Cisco Catalyst 3750 v2 Series Switches are easy to deploy and manage.

Enhanced Security

The Cisco Catalyst 3750 v2 Series Switches have several security features, such as IEEE 802.1x, flexible authentication, multi-authentication, Web authentication, multi-domain authentication, VLAN ACLs, and port-based ACLs that enable a secure network.

Configurable Cisco IOS Software

The Cisco Catalyst 3750 v2 Series can be preconfigured with a specific Cisco IOS Software release at the time of ordering. This option eliminates the need to reload a specific Cisco IOS Software release during deployment, thereby reducing deployment time and cost. The Cisco IOS Software release to be preloaded can be selected from a list of supported Cisco IOS Software releases, including the crypto version.

Redundant Power System

The Cisco Catalyst 3750 v2 Series Switches support the Cisco RPS 2300, which increases availability in a converged data, voice, and video network by providing transparent power backup to two of six attached devices. The Cisco Catalyst 3750 v2 Series Switches are capable of reverting back to their internal power supply without any service interruption. In addition, the RPS 2300 can be managed using a Cisco Catalyst 3750 v2 Series Switch that is connected to the RPS 2300.

MASTER SPECIFICATION XGO™ UTP CABLE 4 PAIR #23 AWG CATEGORY 6A PLENUM

Design Number:
HT54074

DESCRIPTION

UNSHIELDED TWISTED PAIR (UTP) XGO(TM) CABLE FOR USE IN HORIZONTAL CABLING SYSTEMS PER ANSI/TIA-568-C AND ISO/IEC 11801:2002 CLASS EA. THE CABLE EXCEEDS ANSI/TIA-568-C.2 AND ISO/IEC 11801:2002 CATEGORY 6A ELECTRICAL CHARACTERISTICS. THIS PATENTED CABLE CONSISTS OF #23 AWG SOLID BARE COPPER INSULATED CONDUCTORS, ASSEMBLED INTO FOUR TIGHTLY TWISTED PAIRS, WITH A FLEXWEB® CORE SEPARATOR, WITH A RIPCORD, UNDER A FLUTED JACKET WHICH MITIGATES ALIEN CROSSTALK. PRINT INCLUDES DESCENDING FOOTAGE MARKERS FROM 1000 TO 0 ON EACH 1000 FT REEL. THIS PRODUCT AND/OR ITS MANUFACTURE IS COVERED BY US PATENT NOS. 6074503, 7135641, 7154043, 7663061 & 7977575.

THE CABLE IS PLENUM RATED FOR USE IN AIR HANDLING DUCTS AND SPACES IN ACCORDANCE WITH ARTICLE 800 OF THE NATIONAL ELECTRICAL CODE (NEC). THE CABLE IS UL (USA) & cUL (CANADA) LISTED FOR THIS APPLICATION BY PASSING NFPA 262 (FT6 OR PREVIOUSLY UL 910 STEINER TUNNEL) TEST.

SUPPORTED APPLICATIONS

IEEE 802.3an 10GBASE-T (10 GIGABIT ETHERNET), 1000BASE-T (GIGABIT ETHERNET), 100BASE-T (FAST ETHERNET), AND IEEE 802.3 10BASE-T (ETHERNET), IEEE 802.3af POWER OVER ETHERNET FOR VoIP, ANSI.X3.263 FDDI TP-PMD, IEEE 802.5 4 AND 16 Mbps TOKEN RING, ATM UP TO 1.2 Gbps, 550 MHz BROADBAND VIDEO AND STANDARDS UNDER DEVELOPMENT SUCH AS ATM AT 2.4 AND 4.8 Gbps.

CONSTRUCTION

PRIMARIES: CONDUCTOR: 23 AWG (.6 mm) SOLID BARE COPPER
INSULATION: FEP ON ALL 4PAIRS

PAIR ASSEMBLY: 2 PRIMARIES TWISTED IN VARIED LAYS

COLOR CODE: SEE TABLE 1

CABLE ASSEMBLY: 4 PAIRS CABLED TOGETHER WITH A FLEXWEB CORE SEPARATOR

JACKET: NO LEAD PLENUM RATED THERMOPLASTIC
JACKET COLOR: SEE TABLE 2
NOMINAL CABLE OD: .340" (8.64 mm)

LISTINGS: C(UL)US OR C(ETL)US TYPE CMP
UL OR ETL VERIFIED CAT.6A
